RE: Site Assessment Report Addendum: Site 1330, Naval Station Mayport, Mayport, FL

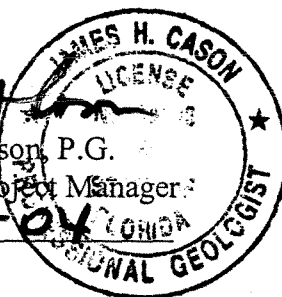

Dear Ms. Washington:

I have reviewed the above document dated December 2003 (received December 19, 2003). Information presented in the report indicates that isopropylbenzene in the groundwater has been delineated and that preparation of a Remedial Action Plan be accomplished. I concur with that recommendation.

Thank you for your continued attention and support in assessing this site. If further clarification is required or if you have any questions, please contact me at 850-245-8999.

Sincerely,

  
James H. Cason, P.G.  
Remedial Project Manager
